

## Welcome,

to the 25<sup>th</sup> edition of 'AMES High', which aims to keep customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

## New Products

### Crew Rest Facilities

AMES has developed and delivered a variety of Crew Rest facilities for Long Range aircraft such as the B767 and A330. The fully customizable lightweight concept utilizes existing passenger seats (B/C for Flight Crew, Y/C for Cabin Crew)

A simple PSU Rail attachment including curtain rails and top covers fully encloses the seat(s) using standard and optional "soundproof" curtain material. Due to the quick release pin attachment, the whole assembly may be removed within a turnaround giving the option to sell the seat for the next flight.

### AMES Illuminated bicolour cabin dividers for EUROWINGS A330

Eurowings A330 commenced the first revenue flight with AMES parts on-board! AMES developed and produced a bicolour illuminated Cabin divider for the entire Eurowings A330 fleet. This customized part is designed to visually separate booking classes and perfectly integrates into the modern interior branding concept of Eurowings.

## AMES Production and Logistic Services receives Top award by the Provincial Government of Styria

AMES PLS our EASA certified Production Organisation was awarded as "Top of Styria" Production Company in November 2015 for its outstanding innovations and performance. We are very honoured by this award for our good performance in past years. For the future we plan to increase our overall performance by doubling our production space in 2016. This will facilitate the development of new cabin products and will also support and improve our short lead times.

## CAMO News

AMES CAMO has received its new extended EASA approval and is now authorized to manage over 50 aircraft types, airworthiness reviews included. Our airworthiness review staff team has expanded further with Mr. Dave Tierney, Customer Support Manager Ireland and Mr. Michael Mayr working in our offices in Austria. This expansion increases our qualified review capacity to more than 12.000 hours per year, enabling AMES CAMO to offer flexible services at short notice.
