

Welcome to the 54<sup>th</sup> edition of 'AMES High', which aims to keep you, our customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

## Increased scope for the privilege to issue certain STCs

AMES EASA.21J.299 Design Organisation received the privilege to issue certain STCs without further authority involvement already in August this year. Due to the high number of certification projects and the excellent rating of our Design Organisation a further extension of the privilege scope is currently in progress. This will cover also B737series cabin layouts of up to 189 PAX.

For our customers this means, certain major changes in the aircraft cabin (e.g. LOPA changes involving dynamically certified seats) can be accomplished without authority involvement, keeping turnaround times to a minimum and providing cost efficiency & certainty.

## AMES Ireland

After increasing our workforce in our CAMO-Team in Ireland we have now received a scope extension of our CAMO approval for A330 and B777 aircraft. This enables us to support your A320 Family and B737 fleet as well as your long-haul A330/B777 fleet for various CAMO services as transitions, Airworthiness Reviews or registration services.

Wishing you a  
very Merry Christmas  
and a successful 2023!

We are looking back on a year with some unexpected but also quite positive developments for us and the entire aviation and travel industry worldwide. Despite economic and geopolitical uncertainties, the demand for air-travel has increased tremendously over the past months and the recovery from the effects of the pandemic is strong.

We have accomplished to keep our AMES team

members over the low demand period in 2020/2021 and have started to expand our workforce very early this year. This fact combined with an optimization of our processes allows us to satisfy the increased demand. Supporting you with the required flexibility and high-quality services, continues to be our core values at the **AMES Group**, enabling us to stay a reliable partner for you in 2023 and beyond

## Christmas Holiday closing

Between 23<sup>rd</sup> of December and 01<sup>st</sup> of January our offices and production facility will be closed. The AMES team is available for your projects again as of **January 02<sup>nd</sup> 2023**.
