

Newsletter No 9, April 2012

**Aircraft Interiors Expo 2012
Hamburg - Thank you!**

Welcome,

to the 9th edition of 'AMES High', which aims to keep customers and suppliers informed about major changes and developments at AMES in the Design, Production and CAMO fields.

It was a great experience for us to be again part of this outstanding industry Expo and at AMES we are very proud to have received so many visits. Our team was delighted by your interest in our EASA Part 21J DOA and Part 21G POA services and the number of positive responses to our new innovative products.

Our new head office building is progressing as planned, bare brickwork is finished and in addition we are increasing our qualified workforce in our Part 21 Organisation.

A very special occasion at the 2012 AIX was the announcement of Condor as launch customer for our EASA approved illuminated Cabin Divider.

AMES developed this Cabin Divider with a special feature to include illuminated logos or signs into the design. This feature provides many options to operators seeking to display their corporate logo throughout the cabin. The color as well as the intensity of the incorporated LED lighting can be adjusted or programmed according to variable customer requirements. The AMES Cabin Divider is accompanied by a product specification, EASA Form 1 and installation instruction. It gives airlines the option of a small and unique separation of different cabin classes beyond the existing walls and curtains and offers many other different applications.

Condor as launch customer will use the AMES Cabin Divider for its Premium Economy product.

Condor project team, together with AMES CEO and Project Manager

René Mamet – Condor Manager Aircraft Phase In:

"We have worked with AMES successfully on many aircraft programs and we are very proud to be part of the development of this new generation Cabin Divider. This illuminated Cabin Divider will support our new Premium Economy product and will make it unique."
